

The new „COVID AUTOMAT OTP“

Dear guests,

we would like to point out that from Monday (16.8.2021) the new „COVID AUTOMAT“ is being introduced. The updated version divides slovak districts into the five degrees: green colour – phase of monitoring, orange colour – phase of alertness, red colour – the first stage of danger, claret colour – the second stage of danger, black colour – the third stage of danger.

In tourist industry these arrangements particularly affect accommodation conditions – the entrance into the lodging facility and the entrance in to the restaurant. The point is primarily about limit capacities, distances and the general mode for vaccinated guests as the case may be for unvaccinated with the test or for those, who had overcome the Coronavirus Disease.

In our hotel we are following protocol OTP (vaccinated, tested, overcome).

OTP means solely persons, who are fully vaccinated, tested (from taking PCR 72 hours, Ag 48 hours) or those, who had overcome the disease COVID-19 for preceding 180 days. According to the Covid Automat, fully vaccinated individuals mean persons who are:

1. At minimum 14 days after the second dosage of double dose vaccine
2. At minimum 21 days after single dose vaccine
3. At minimum 14 days after any kind of dose, if the person has overcome COVID-19 for preceding 180 days
4. Persons till 12 years

Before using our services, let us to ask you for **showing the document, which confirm fully vaccination, negative test or overcoming COVID-19 for previous 180 days on the basis of requirements mentioned above.**

Thank you for your favour and we are looking forward to your visit.
